

Cyber Security

User Awareness Training

You will no doubt have seen in the news lately incidents of hacking and viruses causing local and international businesses some severe issues and damage to their reputation. Resolution IT have also seen a huge increase in these incidents with its own client base.

99% of the time these breaches occur because the end user initiates the hack or data breach by clicking on something they shouldn't. One of the best ways to protect your business is by promoting a consistent security awareness culture and ongoing training.

Session Content

- Ⓞ Why are you a target?
- Ⓞ The change in the cyber landscape
- Ⓞ The cyber gangs – who are they?
- Ⓞ Social Engineering
- Ⓞ Financing
- Ⓞ Techniques used & most common threats
- Ⓞ Real life examples
- Ⓞ Impact of breaches
- Ⓞ Reputational damage
- Ⓞ How can you protect yourself?
- Ⓞ What should the board and company be doing?
- Ⓞ The changes in Data Protection law

We have created this training session so it's informal and relaxed to encourage interaction and discussion between staff members. This atmosphere will hopefully engage all participants so they get the required education they need and guard your business from today's cyber criminals.

- Ⓞ The session will last between 60-90mins
- Ⓞ Ideal numbers per training session are between 1-12 which is carried out at the client's premises
- Ⓞ **All statistics point to staff being the weakest link in a business's cyber security chain**

Please feel free to contact a member of the team if you would like more information or to arrange this training.

To find out more please contact Resolution IT

At PEA we take cyber security very seriously and understand the importance of creating a security culture of consistent awareness and ongoing training. As cybercriminals continue to grow in sophistication, staff need to be kept up to date on what to look out for. We appointed Resolution-IT to assist us in our security awareness training. The seminar delivered in-house to all staff members was engaging and encouraged open discussion and debate. Resolution-IT delivered the training in a manner that all staff members of various levels understood; the result is a much improved security awareness not only in the work environment but also in the home environment.
